Other Linear Motion Rolling Guides

LSAG

Using a two-row and four-contact point structure, LASG is a very compact **Ball Spline G Series** with high rigidity and a small outer ring diameter.

For outer ring shapes, there are two shapes, the standard type (cylindrical shape) **LSAG** and the flanged type **LSAGF**. The standard type and the flanged type include 2 types of different outer ring length, a standard type and a high-rigidity long type, both of which have the same sectional dimensions.

For spline shafts, solid shaft and hollow shaft are aveilable. A spline shaft made of stainless steel is also available. LSAG is most suitable for applications requiring smooth linear motion and accurate positioning in the direction of rotation.

Available with:

Interchangeable series

Capillary plate

LSB

Block Type Ball Spline has excellent spine functions and maintainability and easy mounting of the Linear Way.

Available with:

Interchangeable series

Stainless steel type

LMG

Available with:

Interchangeable series

LMG is **Linear Bushing G** adopting a shaft with raceway grooves to achieve both high rigidity and high load capacity.

BWU

Stainless steel type

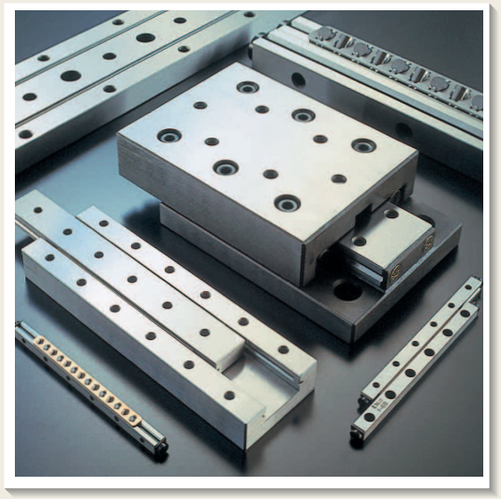

BWU is a compact **Linear Slide with high precision and high rigidity** that is made entirely of stainless steel. This Linear Slide is the most suitable for precision equipment operated in clean rooms.

BSP·BSPG·BSR

Stainless steel type

These are very small and lightweight **precision Linear Slides.** They can be widely used as functional parts for precision linear motion.

CRW·CRWU

Available with:

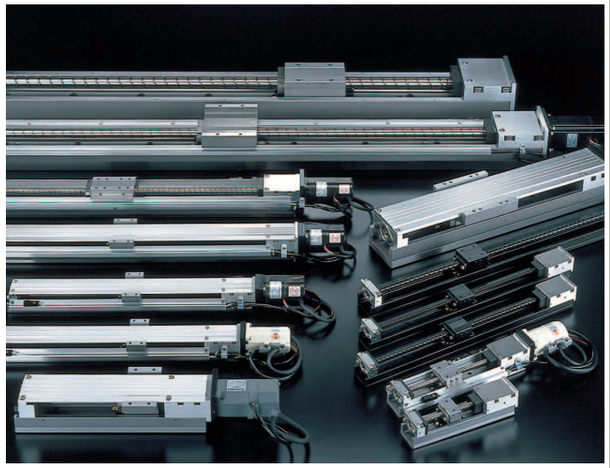

Stainless steel type

These are high-reliability **Crossed Roller Way Series** with very small frictional resistance, very high accuracy and high rigidity.

M

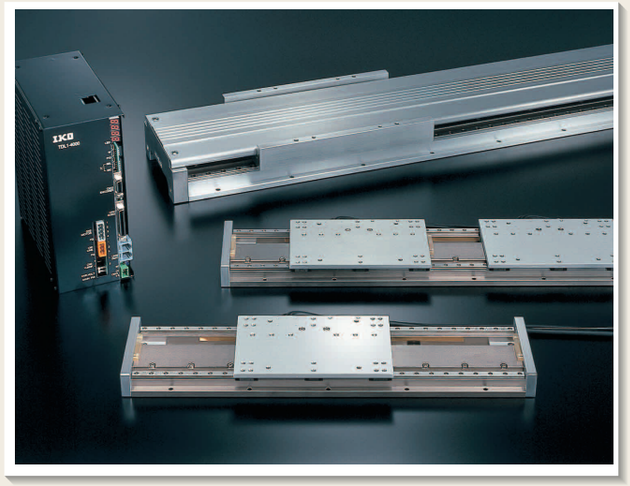

Mechatronics Series

TU Series

IKO Precision Positioning Table TU is a compact and slim positioning table with good load balance and high resistance to complex loads, in which the side table is arranged inside the U-shape track rail. Six types with a track rail width of 25～130mm are available. Each slide table length can be selected as required. Different table specifications including ball screw, motor, sensor, etc. can be selected. This allows each user to configure the most suitable positioning table for each application.
Abundant options meet diversified market needs such as a motor loopback specification, table with bellows, table with bridge cover, and table finished by black chrome surface treatment.

Linear Motor Table LT

The IKO Linear Motor Table LT is a compact and lightweight direct-drive positioning table with a very small sectional height in which an AC servo-motor and an optional linear scale are integrated in a moving table and a bed made of aluminum alloy.
The IKO Linear Motor Table LT employs a C-shaped magnet yoke, and a coil board is sandwiched between two stator magnets. It provides a high thrust of 450N though its height is only 40 mm. The moving table is as light as 1.5 kg but provides high thrust. It permits high acceleration and deceleration exceeding 10 G. (In the case of LT150 CG.) Also, High Thrust Series LT···H outputs 900N thrust.

Using advanced servo technology, this product achieves high static stability and high-speed stability.

Long-stroke Series

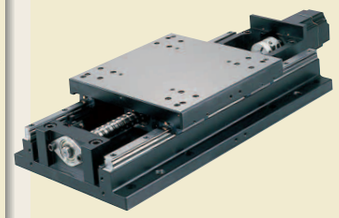

- Standard type which has been practically used in many fields.
- Stable characteristics in parallel use together with Linear Way

TSL

High-rigidity Series

- High reliability and high accuracy with component parts strictly selected
- High rigidity and large mounting weight

TSLH·CTLH

Table Module Series

- Multi-axis tables up to 3 axes available as series
- Lightweight and compact in addition to a simple structure

TSMA·TSMS·CTMA

Compact Series

- Compact structure with a small sectional height
- High reliability and high accuracy achieved by using Crossed Roller Way

TS·CT

High-speed Long Stroke Series

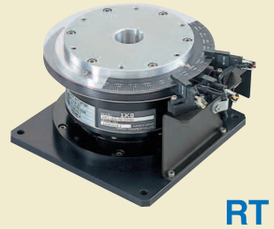

- High-speed type using a timing belt drive
- Stable and high traveling performance in parallel use together with Linear Way

TSLB

Precision Rotary Table

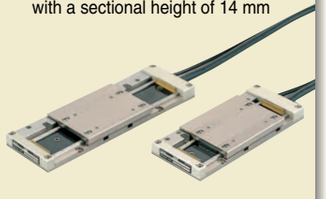

- High-speed and high-resolution rotation positioning table
- High accuracy and high rigidity achieved by using Crossed Roller Bearing

RT

Nano-linear

- Direct drive type with high speed and high response
- Maximum thrust of 25 N achieved with a sectional height of 14 mm

NT

- Direct drive type with high speed and high response
- Simple shape with a very small sectional height

NSC

Equipment Related to Electrical Devices

- Program controller with high functions and high operability
- Driver for motor drive specially designed
- Compactly integrated control unit
